2. Posts and Beams

- Recycled
- Reclaimed
- New

Ironwood Australia is a major supplier of Class 1 durability Australian hardwood posts. These posts are available in a large range of sizes, with a finish to suit all applications. These applications include structural, decorative and feature applications for both internal and external use.

Recycled

Recycled timber is re-milled from large sections of timber predominantly from bridges, wharves and warehouses up to 100 years old. Providing seasoned posts in large section sizes. This timber is naturally air seasoned and has minimum shrinkage and movement.

The timber from bridge and wharves usually have character and features from previous use such as nail and bolt holes and checking, which provide a unique look and patina. Warehouse posts that were originally used internally have a much cleaner look.

All these timbers can be dressed all round (DAR), rough sawn (RS) or hand wire brushed (WB). They are also available in the Heritage Collection as original weathered posts.

FEATURE USES

Structural
Internal use
External use
Load bearing supporting beams
Verandah and Pergolas
Landscaping and garden feature posts

Reclaimed

At Ironwood we salvage timber from old forestry logs, and larger pre cut structural timbers that have not made the grade. This timber is then re-cut and milled removing any faults, creating a product ready for use. This process provides carbon storage for years to come while also minimising waste.

Reclaimed timber is semi seasoned with further seasoning in situ with some or minor shrinkage and checking.

CADES POSTS

Our new range of Cades Posts are included in this range. These posts don't contain bolt holes and can be supplied greyed off and wire brushed or with a DAR (dressed all round) finish.

Structural rating from F11, F14, F17 and F22.

FEATURE USES

Structural
Construction
Internal use
External use
Verandah and Pergolas
Featured Fencing and Landscaping

New

Ironwood also supply new Class 1 durability Australian hardwood Posts and Beams from our NSW forestry approved hardwood logs. From these we supply major timber bridge, wharf and marine builders with high quality structural rated timber in long lengths and large section sizes.

These timbers are also available to builders and the general public.

Structural rating from F11, F14, F17 and F22.

FEATURE USES

External Structural applications
Pergolas
Fencing and Landscaping
Timber Bollards
